Wi-Fi Hotspot Ranges

WIFI Satellite Clouding Hotspot radio range is controlled by our server. We offer 3 different radio range.

Hotspot Small Range (+/- 50 m to 100 m LOS) :

Satellite normal radio range WIFI hotspot.
Good for a small environment

Hotspot Medium Range (600 m LOS) :

Best solution for small institutions and business, to provide internet for their local users.

Hotspot Long Range (1.5 km LOS) :

Design for high-density usage.
Radio range of 1.2 Km to 1.5 km per BTS/Cell. Radio Repeater logic to extend the coverage is integrated.
