TRACKER STICK

World's smallest satellite communications device

A compact two-in-one cellular and satellite connectivity device, Tracker Stick has a unique check-in button which enables users to send unlimited free preset messages and location information without using the phone. With 100% global network coverage by Iridium, it is easy to access two-way text messages to phone numbers and email addresses as well as share real-time location information. Along with a dedicated app, Tracker Stick is perfect for iOS and Android mobile platforms. Cellular services are handled over the app on a smartphone and satellite services are delivered over the device itself. A dedicated SOS button on Tracker Stick delivers emergency services by Global Rescue, an industry leader in medical, security, evacuation, and crisis management services. With its rugged and simple design features, Tracker Stick is compatible with all GoPro mounting systems.

FEATURES

**100% global
satellite connectivity**

**Two-way text
communications**

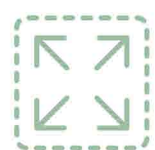

**Real-time location
sharing**

**Check-in
button**

**Dedicated
SOS button**

**Rugged
and compact**

KEY FEATURES INCLUDE

Interoperability

Worker Safety

Fleet Management

Alerts & Monitoring

Geofencing

Maps

MULTIUSER CORPORATE SOLUTION POWERED BY TRACKING SATELLITE

Tracker Stick device and app are now fully integrated within the Tracking satellite ecosystem to deliver the professional features of Tracking satellite's platform. Businesses can efficiently connect major cellular, satellite (Thuraya, Globalstar, and Inmarsat), hybrid, and radio networks to deliver user-friendly services over web platforms and third-party apps. The HQ obtains total visibility over an unlimited number of assets on a single screen, which decreases response time and allows better decision-making.

With comprehensive satellite coverage, Tracking satellite's cloud-based server and the Tracker Stick app deliver value-added services such as pace tracking, mileage, altitude, offline maps, and the GroupTrack feature for groups of up to 12 people. Users can enable rights and permissions from simple read-only access to full administration.

Tracking satellite's platform enables multiple geofencing capabilities such as dynamic, circle, and polygon as well as

point-of-interest management functionalities such as time-out alerts, maintenance alerts, speed alerts, and much more.

Small businesses and corporate groups benefit from affordable worker safety services, flexible fleet management solutions, and high-priority alerts and monitoring over email, SMS, and voice calls. Moreover, this innovative integrated solution enables users to generate complex history and reports, either in maps format (online or KML export) or tabular format (CSV or HTTP), for one or multiple trackers for any time interval.

SPECIFICATIONS

WEIGHT:
100 g

DIMENSIONS
11.15 cm (height); 4.5 cm (width);
2.05 cm (depth)

OPERATING TEMPERATURE
-30°C to 50°C

INGRESS PROTECTION RATING
IPX7

BLUETOOTH 4

BATTERY LIFE
Up to 120 hours

RECHARGEABLE LITHIUM ION BATTERY

COMPATIBLE WITH GOPRO MOUNTING SYSTEM

ACCESSORIES
USB-C Charging Cable
Carabiner
Cord
¼ - 20 Mount Adaptor
